Let us go step by step how all the 5 planets plays significant role in brain Hemorrhage.

1. Mercury governs mental functions and will equally influence both hemispheres of the human brain. Mercury also rules automatic body functions (breathing, blinking etc) and works with the moon in digestive functions too.
2. Uranus also governs the nervous system along with mercury. It governs both on an individual scale and on a societal scale. Uranus also plays a role in the respiratory function. Bronchial tubes, lungs, asthma are all affected by the influence of Uranus
3. Moon governs the fluid of the body. It includes water retention, blood flow, digestive motion and cellular moisture all respond to moon energy.
4. Mars is the red planet. It influence on our red blood cells and natural oxidation in the body.
5. Saturn governs our bones. It plays a part in bone density, distribution of calcium and other fortifying vitamins.

What is brain Hemorrhage and how it link with above Planet's?

A brain hemorrhage happens when an artery in the brain bursts. This discharge of blood can disrupt the normal circulation to the brain, so it can lead to a stroke, which occurs when part of the brain is deprived of oxygen. Strokes can cause temporary or permanent brain damage.

Bleeding within the brain can also raise the pressure inside the skull to dangerous levels. This high pressure in turn can cause the hemorrhage to bleed faster, leading to a vicious cycle of damage within the brain.

Brain is the key part in our body. It will function if all the above mentioned parts are functioning properly. All the above mentioned parts directly govern by the above planets.

People who have got brain hemorrhage are due to previous karma.
