## Life Changing Article

Dear Friends,

I would like to share my life changing experience using Graphology.

Many of us have different problems with family, colleagues, friends etc... but don't know how to come out of these small petty things which over a period of time magnify to such an extent that we start facing serious health problems.

This is a live example, I was appointed as a HR executive in one of the leading recruiting firms in Bangalore eight years back. During my tenure, I had great friend circle at my work place. I had no knowledge about Graphology but one of my colleagues insisted me to get my handwriting analysis done. I was shocked to know how true my handwriting was. It was a reflection of my sub conscious mind. I decided to learn the art of Graphology and I am proud to say that I am one of the successful people leading a business who has benefitted through Graphology. Lot of my clients also benefitted through my analysis.

Firstly, I would like to give a small synopsis of what Graphology is all about and later would share two samples of my clients who have had tremendous change in their life based on my analysis.

An individual's physiological and psychological functions are depicted in a person's handwriting. Writing is expressive behavior and communicates personality characteristics. The act of writing contains spontaneous actions for the purpose of communicating ideas. The act of handwriting uniquely fulfills the requirements for a projective personality test. The writer records responses to testing stimuli by writing. Graphology thus, is a simple method, which if effectively used can reveal truckloads of information about a person merely from a few scribbles that he/she has happened to make.

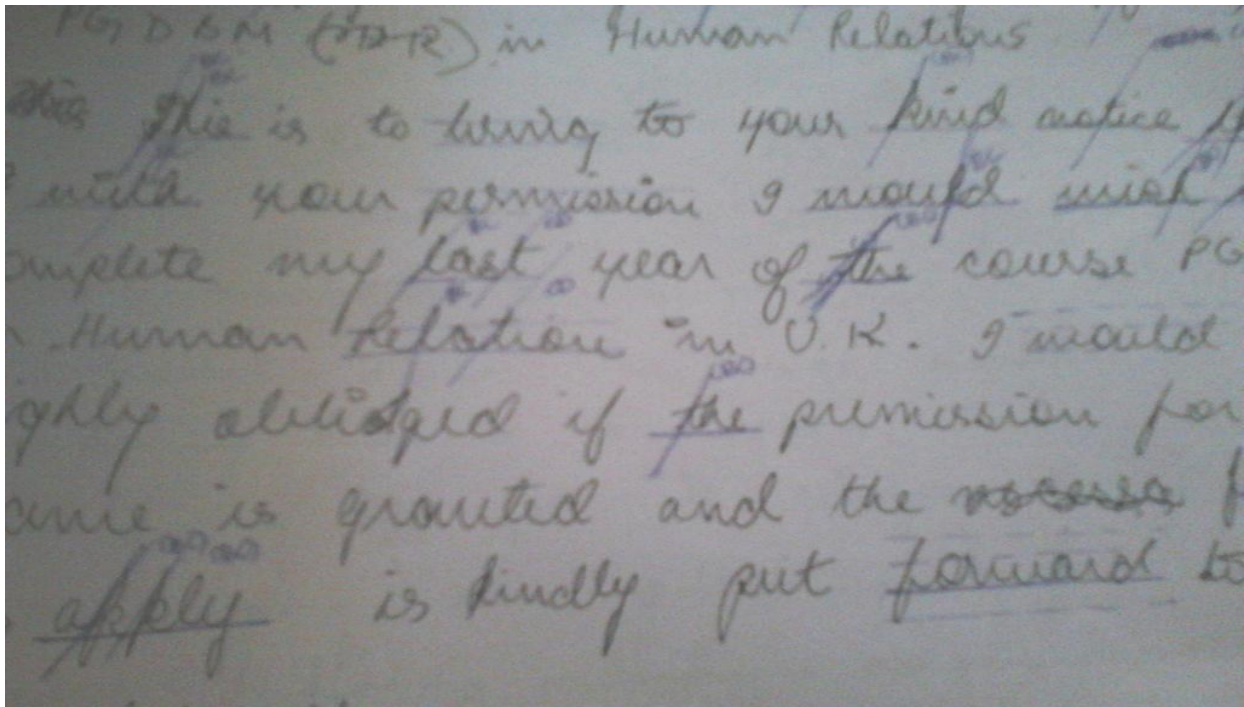

### **YOUR HANDWRITING NEVER LIES!!!**

The different areas of your life where handwriting analysis can be used are Relationship, marriage, crime detection, Career.

---

Analysis 2:-

He gives more attention to details. He is cumulative thinker. He is emotionally responsive and optimistic.

I would like to help to change many more people's life and make them successful in all the ventures.

Hope this journey of changing one's personality would be fruitful.

Thanks & Best Regards

Archana Venkatesh
