Vastu Analysis on Fire Accident at Mulund

Overview:-I got diverted as there was huge noise due to fire engine. The fire accident happened on 25th Mar 2012, Sunday evening at Bamboo Godown opposite to High land park, Mulund. I went to that place and started analyzing on Vastu front as this is the 2nd time as it has already happened 6 months back as well.

Is it Major fire accident and what is my analysis?

Yes, it is major fire accident. Thanks to Fire God as there was no casualties. Almost 20 to 25 fire engines came for rescue. Fire blew and spread across other areas as well.

My analysis:-

- i) Due to elevation of North West than the south west (or) location of wells or pits leads to inhabitant insolvent.
- ii) Due to diagonal measurement from southeastern corner to the north western corner would be more than that of the measurement from north east to south west leads to fire accidents.
- iii) There is public toilet at South West. As per Vastu, this is big vastu dosh
- iv) North, North East and East areas should be neat and clean however they have dumped old rusted cars, iron stuffs
- v) There is open drainage line going close to North East which is big vastu dhosh

Conclusion:-

I have tried to contact the owner of the bamboo godown to explain the vastu dhosh but he is not reachable. I would like to help him on vastu front so that he would not incur more losses next time.
